

New!

Turn Standard
Single-Deep Frames ...

Into Two-Sided
PICKING SOLUTIONS!

Introducing **Pick Wire™**, the simple but elegant innovation from Husky Rack®. This one-of-a-kind deck turns standard, single-deep frames into two-sided picking solutions. The 3-inch overhang in tandem with the sloped design provides both a clear view and easy access to manually handled boxes or bins. Best of all the design allows for an extra beam level over five or six levels, meaning more storage capacity than standard flat wire decks. As with all Husky Rack® products you can count on a wide selection of sizes & capacities, and our famous 48-hour & X-Treme Shipping programs.

SPECIFICATIONS

- 6 Ga., Galvanized Wire
- Available in 3 & 4 Channel Designs
- 10 Degree Angle With 3" Overhang
- Durable Metal Overlay Prevents Injury from Leading Edge
